Vidyalankar School of Information Technology :

Vidyalankar School of Information Technology (VSIT) is a part of Vidyalankar Dnyanpeeth Trust and is affiliated to the University of Mumbai. It was established in the year 2002. VSIT offers both graduate and post-graduate programmes in the subjects of Information Technology, Commerce and Management. The programmes offered are B.Sc. IT, M.Sc. IT, B.M.S., B.M.M, B.Com. with specialization in Accounting & Finance, Banking & Insurance, Financial Markets; M.Com in Banking & Finance. It also offers management programmes at post-graduate level with specialization in Human Resource Development, Marketing Management and Financial Management. VSIT has tie-ups with renowned International Universities like Penn State University, University of Toledo and University of South Carolina, Aiken, University of Rutgers, Camden, Royal Roads University, Canada. It has always been an endeavour of VSIT to create all round personalities through various knowledge sharing programs and beyond the syllabus activities in collaboration with various committees.

About the workshop:

Fintech has been a buzzword in the world of finance and has significantly shaped various areas, including banking, insurance, and investments. It also has a unique capability to extend financial inclusion, improve the daily lives of people, and spur growth. Anticipations are that the Fintech domain is to play a very crucial role in a post-COVID-19 world. And, for that to happen, the Fintech industry needs to evolve and adapt to this new scenario.

The four days Workshop on Fintech will help to understand market developments fuelled by technology that are affecting Finance domains and their traditional business models, with a focus on innovating the business using technology.

Objectives of the workshop:

To create awareness about Financial Technology.

To understand the basic concepts, functions and skill sets required for financial technology.

To educate the participants about opportunities and challenges of current blockchain solutions.

To critically evaluate recent Case studies in financial technology.
